EDUCATION

Bachelor of Computer Applications (BCA)

Dr. Ghali College | CGPA: 8.2/10

Gadhinglaj, Maharashtra

July 2023 – May 2026

- Relevant Coursework:** Data Structures & Algorithms, DBMS, OOP, Software Engineering, Computer Networks

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL, HTML5, CSS3

Backend Technologies: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, JWT

Frontend Technologies: React.js, Tailwind CSS, Bootstrap, Responsive Web Design

Databases: PostgreSQL, MongoDB, Redis, MySQL

DevOps & Tools: Git, GitHub, Maven, Postman, npm, Linux, Nginx, AWS (EC2, S3)

Core Competencies: Data Structures & Algorithms, OOP, Design Patterns, SDLC, System Design

Problem Solving: LeetCode - 80+ problems solved.

PROJECTS

Scout IQ - Football Scouting & Analytics | Spring Boot, React.js, PostgreSQL, Redis, AWS Apr 2026 – Jun 2026

- Developed full-stack football analytics platform with 1000+ player profiles, enabling scouts to search, filter, and compare statistics across multiple leagues with real-time data visualization dashboards
- Engineered RESTful API endpoints with filtering, and sorting, reducing database load by 65% through optimized queries and proper indexing strategies
- Implemented Redis-based caching for frequently accessed data, improving API response time by 40% (820ms to 490ms) and supporting 100+ concurrent users during load testing
- Built responsive React frontend with Chart.js visualizations and mobile-first design.
- Deployed on AWS EC2 with Nginx, achieving 99.5% uptime during testing phase
- Links:** GitHub | Live Demo

Urban Rides - Car Rental Platform | Spring Boot, React.js, MongoDB, JWT Dec 2025 – Mar 2026

- Built comprehensive car rental system with end-to-end booking workflow, automated billing, and real-time inventory tracking for 50+ vehicles across multiple categories
- Implemented secure authentication using Spring Security with JWT tokens and Role-Based Access Control (RBAC) managing separate permissions for customers, staff, and administrators
- Designed optimized MongoDB schema with indexing and aggregation pipelines, reducing complex query execution time by 55% for booking history and vehicle availability checks
- Developed dynamic pricing engine calculating costs based on vehicle type, rental duration, and seasonal demand using custom business logic in Spring Boot services
- Created responsive booking interface with React hooks, form validation, and real-time availability calendar
- Links:** GitHub | Live Demo

ACHIEVEMENTS & LEADERSHIP

Competitive Programming & Problem Solving

- Solved 80+ DSA problems across LeetCode and coding platforms with focus on patterns and problem-solving.
- Strong foundation in Arrays, Strings, HashMaps, Recursion, Dynamic Programming, and Sorting Algorithms

Sports Captain

- Led team, strategy planning, and coordination for tournaments demonstrating leadership skills

CERTIFICATIONS

The Complete Web Development Bootcamp: Angela Yu (Udemy) - 60+ hours comprehensive full-stack course
