SUMMARY

BCA graduate with strong fundamentals in Core Java, Advanced Java, and Hibernate, and hands-on full-stack experience (Spring Boot, React.js) building and deploying complete web applications – REST APIs, relational and NoSQL databases, caching, and cloud deployment. Solved 110+ problems on LeetCode. Looking for a Java development internship where I can apply strong OOP and framework fundamentals to real project work and grow into a full-time role.

EDUCATION

Dr. Ghali College

Gadhinglaj, Maharashtra

Bachelor of Computer Applications (BCA); CGPA: 8/10

July 2023 – May 2026

- Relevant Coursework: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Software Engineering, Computer Networks

TECHNICAL SKILLS

Core/Advanced Java: OOP, Collections, Exception Handling, Hibernate (ORM)

Languages: Java, JavaScript, Python, SQL, HTML5, CSS3

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, React.js, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MongoDB, Redis

Tools: Git, GitHub, Maven, Postman, npm, AWS (EC2, S3), Linux, Nginx, REST APIs, JWT

PROJECTS

Scout IQ | [Live Demo](#)

Apr 2026 – Jun 2026

Spring Boot, React.js, PostgreSQL, Redis, AWS

- Built a full-stack football scouting platform with 1,000+ seeded player profiles, supporting search, filtering, and stat comparison across multiple leagues
- Optimized REST API queries and added database indexes, cutting query execution time by 53% in local benchmarking
- Added Redis caching for frequently-hit endpoints, lowering average response time from 820ms to 490ms
- Deployed on an AWS EC2 instance behind Nginx as a self-hosted demo

Urban Rides | [Live Demo](#)

Dec 2025 – Mar 2026

Spring Boot, React.js, MongoDB, JWT

- Built a two-sided car rental marketplace connecting car owners who list vehicles with renters booking multi-day trips, with end-to-end listing, booking, and billing workflows
- Developed separate owner and renter dashboards for listing management, availability calendars, and multi-day booking requests
- Implemented JWT-based authentication with Spring Security and role-based access control (RBAC) for owners, renters, and admins
- Designed a MongoDB schema with indexes and aggregation pipelines, cutting complex query time by 55% for booking history and availability checks

ACHIEVEMENTS

Competitive Programming: Solved 110+ DSA problems on LeetCode, with focused daily practice across core data structures

Sports Captain: Led team strategy and coordination across tournaments, developing leadership and decision-making under pressure

CERTIFICATIONS

The Complete Web Development Bootcamp – Angela Yu, Udemy (60+ hours, full-stack)
